- 

### Construction Guide:

1. Firstly use the base box to support the pole and lie the unit on it's side with the rounded section to the top.

2. Next, remove the back panel on the base of the slim stand by removing the four screws. This will allow you to access for insertion of the screws to hold the pole. Place your star screwdriver through the hole and add the screw and affix the pole to the base.

3. Now screw the pole to the base in four places. Add the base panel back on.

4. Next place your touch screen face down gently on a protected surface and screw the vesa mount plate to the stand.
