INFSMOBILE-P

Portrait Mobile Floor Stand

Ideal to mount your 32" & 42" touch screens, the Mobile Floor Stand is perfect for situations that require mobility like exhibitions, temporary installations or sharing the touch screen with multiple rooms. The screen is angled nicely for an excellent user experience while the stand is painted in a stylish silver finish and can be custom branded to match your corporate image. The heavy-duty wheels make the touch screen stable to use and easy to move around. You can then lock it into place using the secure castor locks located on each wheel. The back of the unit has a lockable tamper proof door to ensure your computer and any other peripherals are stored safely inside.

Shown with InTouch 42" Touch Screen (not included)
