

## DATA SHEET

# INTSMOBILE

## Portrait or Landscape Mobile Floor Stand

Our new INTS-MOBILE stand is perfect to mount your 42" or 55" touch screen. This stylish mobile stand moves with ease between meeting and huddle spaces boasting heavy duty castors. Created with a heavy-weighted base for rock-solid stability, and no protruding legs, this stand is functional and safe. The clean, minimalist design continues behind the screen, with all cables on the rear side hidden internally. Neatly store your mini PC internally within the mobile stand or opt to connect your laptop which can sit neatly on the front wooden or metal shelf.

Our INTS-MOBILE stand can also be easily configured to accommodate the Logitech Meetup, taking your video conferencing to the next level.

*Shown with InTouch 55" 4K Touch Screen (not included)*
